Our Ronald McDonald Family Rooms were created in response to RMH of SNJ’s commitment to enhance our services to families of seriously ill and injured children throughout the nine southern counties of New Jersey.

Family Rooms are a place for parents, siblings and extended family members to rest or relax while still remaining close to their hospitalized child. Our goal is to provide an uplifting setting that offers comfort and support to families while their children are in a pediatric unit, PICU, NICU or emergency department receiving medical treatment.

Our Family Rooms expand our services to families of hospitalized children throughout the nine southern counties of New Jersey.

Family Rooms provide an uplifting setting for family members whose children are in a pediatric unit, PICU, NICU or emergency department receiving medical treatment.

At our family room in AtlantiCare, volunteers like Denise greet families and help bring a warm, friendly atmosphere and welcoming smile into the hospital. Complimentary snacks and beverages are provided to refresh parents.

“My favorite part of volunteering is meeting so many wonderful family members, who pop in to the Ronald McDonald Family Room for a short respite and nourishment. They are so grateful the family room is on the same floor as their hospitalized child.”
